

Software Product Manager - EverClean

Greensea IQ is a dual-use robotics company transitioning mature solutions developed for and by the defense industry to the commercial markets for high impact.

Greensea IQ is uniquely positioned to capitalize on the growing Blue Economy that is being driven by the demands for scalable and persistent ocean protection, net-zero emissions in shipping, alternative energy sources from the ocean, and understanding the impact to the seas as our climate changes.

As a world leader in autonomous underwater robot technologies, we deliver high impact solutions to meet the growing demand for efficiency, safety, and scalability across the entire Blue Economy.

Job Description

We are seeking a Software Product Manager to lead the development of a user interface that enables advanced navigation and autonomy for our robotic systems. This role requires close collaboration with highly technical teams to articulate needs, prioritize work, and deliver features that empower end-users in the field. The ideal candidate will bring experience managing software development in technical domains, with a strong background in backlog management, Jira-based tracking, and stakeholder engagement.

Responsibilities

- Define and maintain the product vision and roadmap for the robotic user interface
- Gather requirements from technical stakeholders and end-users to ensure teams focus on building the right features.
- Translate user and business needs into clear product requirements and backlog items.
- Manage and prioritize the product backlog, ensuring alignment with organizational goals.
- Use Jira to track progress, manage sprints, and communicate project status.
- Establish and oversee delivery cadence to ensure regular, reliable software releases.

- Partner with engineering and autonomy teams to align feature development with system capabilities.
- Facilitate communication between technical teams and field operators to validate usability and performance.
Monitor adoption and feedback from field deployments to refine the product roadmap.
- All other responsibilities as reasonably assigned.

Requirements

- Bachelor's degree in a relevant business or technical field
- 4-7 years' experience with product management, software development life cycle, software products, and software development teams. Personal software development experience is not required but experience within the field is expected.
- Background working with highly technical engineering teams.
- Familiarity with robotics, autonomy, or complex technical systems preferred.
- Strong knowledge of backlog management and Jira (or similar tools).
- Experience developing and maintaining delivery schedules or release cadences.
- Ability to translate complex technical requirements into clear, actionable plans
- Highly organized and able to manage multiple stakeholders
- Excellent communication skills, both written and verbal, and the ability to see the big picture.

To apply, please send your resume, salary requirements, and cover letter to careers@greensealQ.com as PDF documents. The candidate must be eligible to work in the United States. Occasional travel may be required This position is based in Plymouth, MA. Annual salary range: \$130,000-150,000.

Greensea IQ (www.greensealQ.com) is an equal opportunity employer. We offer a casual and fun work environment and provide our employees training and continuing education opportunities. Greensea IQ offers competitive salaries and a complete benefits package, including full health insurance, 401(k), and paid vacation, holiday, and sick leave.
