

Product Manager – EverClean Field Service

Greensea IQ is a world leader in advanced robotic solutions for the ocean. We are a dual- use technology company that has pioneered the use of autonomous systems in critical defense applications and is now transitioning that mature technology to the commercial maritime markets.

Greensea has a defense product portfolio focused in Mine Countermeasures, Explosive Ordnance Disposal, and Special Operations. Since 2017, we have pioneered the use of autonomous robots and artificial intelligence to create scale and safety in ocean warfare while protecting the warfighter.

Greensea's emerging EverClean product transitions defense technology to the commercial sector to create high impact and achieve significant growth within a large market.

EverClean uses autonomous underwater robots to keep the hulls of ships clean, allowing ships to perform optimally. This Robot-As-A-Service business provides significant fuel savings, carbon emissions reductions, and increased vessel performance through a simple subscription program.

Job Description

The Product Manager, EverClean Field Service, leads the direction of our service operations for EverClean, a field-service platform supporting ROV-based hull-cleaning operations. This role defines the roadmap, guides execution, and ensures the product meets operational needs across vessels, technicians, and managed service providers. The Product Manager is accountable for enabling the field-service organization to deliver consistent, measurable, high-quality cleaning on every vessel visit. The role emphasizes building repeatable processes and using data to understand and improve the performance of both the technology and the field teams. This position works closely with technology, performance, and field-service teams to ensure EverClean delivers high quality at scale.

Responsibilities

- Own the roadmap and strategy for EverClean Field Service.
- Use data to assess service consistency, cleaning quality, uptime, and operational efficiency.
- Build repeatable processes that support reliable delivery across vessels and regions.
- Partner with engineering, performance analytics, and field-service leadership to identify gaps and validate improvements.
- Ensure features and processes can scale globally with consistent quality.
- Support deployment, documentation, training, and adoption of new capabilities in

the field.

- Maintain clear communication on priorities, releases, and performance metrics.
- All other responsibilities as reasonably assigned.

Requirements

- Bachelor's degree in a business or technical field, or equal, relevant experience.
- 5+ years experience in product management or in adjacent operational or technical roles.
- Ability to design and implement consistent, reliable field-operations processes and procedures.
- Comfort working with hardware, software, and distributed field teams.
- Strong analytical skills and experience working with operational or performance data.
- Maritime, robotics, or field-service experience is beneficial.

To apply, please send your resume, salary requirements, and cover letter to careers@greensealQ.com as PDF documents. The candidate must be eligible to work in the United States. his position is based in Richmond, VT or Plymouth, MA. This position will require occasional travel. Annual salary range: \$120-130K
